**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121.
  - I. Claims 1-8, drawn to a self service terminal comprising a digital data port for interchange of customer data and means for transferring said data between port and a digital data network, classified in class 709, subclass 238.
  - II. Claims 9-11, drawn to a self service terminal network comprising a plurality or self service terminals, a digital server, and a number of dedicated communication links between the servers with access to external networks, classified in class 709, subclass 203.
  - III. Claims 12 and 13, drawn to self service terminals having an email facility, classified in class 709, subclass 206.
  - IV. Claim 14, drawn to a method of creating a user profile comprising a self service terminal to receive information from a portable digital device, analysis of the received data, and storage of profile in a database, classified in class 705, subclass 1.
2. The inventions are distinct, each from one another because of the following reasons:

Inventions I and II-IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as in a network not including other self service terminals (as set forth in invention II) that do not have an email facility (as set forth in invention III), and where the method of analyzing, and storing the

customer profile is not an included function (as set forth in invention IV). See MPEP § 806.05(d).

3. The inventions are distinct, each from one another because of the following reasons: Inventions II and III-IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as in a network of a plurality of self-service terminals that do not have an email facility (as set forth in invention III) and where the method of analyzing, and storing the customer profile is not an included function (as set forth in invention IV). See MPEP § 806.05(d).

4. The inventions are distinct, each from one another because of the following reasons: Inventions III and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention III has separate utility such as a network of terminals that have an email facility but where the method of analyzing, and storing the customer profile is not an included function (as set forth in invention IV). See MPEP § 806.05(d).

The inventions are distinct, each from the other because of the following reasons:

5. A telephone call was made to Michael Chan on 05/03/2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
